

TECH ACADEMY

HERZING UNIVERSITY

HERZING UNIVERSITY

Herzing offers three condensed IT programs that prepare students for entry-level positions in the networking field.

CERTIFICATIONS

The Tech Academy programs prepare students for exams leading to several certifications from industry leaders such as Microsoft, CISCO, and CompTIA.

- Microsoft Certified IT Professional – Server Administrator (MCITP)
- Cisco Certified Network Associate (CCNA)
- CompTIA A+

ACCELERATED, YET CONVENIENT

The programs were designed specifically to fit into the schedule of the working, time-constrained adult. Classes don't require a lengthy commitment – courses are taught in a format that allows you to take a portion of the program online from anywhere with Internet access and attend the lab portion on campus just two nights per week. **Two nights a week, four hours per night, for five, six, or eight months depending on which program you choose, and you're done!** The programs are accelerated and will be demanding, but rest assured the time will fly right by.

ALL-INCLUSIVE PRICING

No additional or surprise fees! Program pricing includes:

- Exam fees for your first attempt at each of the exams your diploma covers
- Laptop use throughout the entire program
- Textbook use for every course
- Career Development for employer connections, resume help, and job search coaching

PERSONAL LAPTOP IS SUPPLIED

We'll supply you with a laptop to use during your program. The laptop will be used exclusively by you, and it will be configured for use with your classes so you'll have access to everything you need, anywhere you choose to use it.

EARN UNIVERSITY CREDIT

Best of all, you'll be preparing to take industry exams while earning university credits. The credits you earn can be transferred toward an associate degree in computer networking or a bachelor's degree in IT or technology management.

AFTER GRADUATION

The goal of all your hard work is a job in your profession. That's why each Herzing University graduate works personally with our Career Development Department to identify employment opportunities. Our networking diplomas can prepare you for entry-level IT jobs, but they also lay the groundwork for degree programs that can lead to increased compensation and promotional opportunities.
